File No.: DS-ARTR-001  
Supersedes: new

Date: 21 Apr 2014  
Date: new

**NOTES**

- Model ARTR rail is a curb-mounted vibration isolation rail with adjustable integral isolators
- 1" (25 mm) or 2" (50 mm) static deflection springs as specified
- Full perimeter neoprene gasket will be supplied loose for field installation
- Rail is constructed from minimum 4" (102 mm) high gauge G90 galvanized steel top channel
- Special top arrangement with a counter-flashing available for rooftop units that do not have a perimeter base with an overhang

**OPTIONS**

- Duct supports
- Flexible duct supports
- Knock-down construction for field assembly
- Solid top cover
- Isolators for pedestal mounting
- Seismic and/or wind: include calculations stamped by a PE
- Noise control: 2" (50 mm) acoustical barrier framing
